NUMBER of HOUSES and INHABITANTS in some of the principal TOWNS in the UNITED STATES.

THE following sketch of the number of houses and inhabitants in the principal towns in the United States, is as correct as can at present be obtained, and will give the reader an idea of their comparative populousness.* Where the number of inhabitants is not accurately known, we have reckoned at the rate of seven in a house—which, from actual enumeration, is found to be nearly the average number. The numbers to which an *asterisk* is annexed are conjectural—the rest are from actual enumeration.
