## VOX.

VOX ei acutior, quàm peregrino. Eſt enim humidior, & pituitoſior, vt ait Albertus. Vnde cũ frigidiori temperamento ſit, vocis inſtrumenta etiam anguſtiora eſſe contingit, quæ largior calor dilatare ſolet, grauioremque vocem edere.

## VENATVS. MORES.

IN auibus inuadendis, ait Albertus, minus audax ob humidum nimirum, & pituitoſum temperamentum. Rarò enim inuadit aues Pica, vel Cornice maiores, cùm peregrini, alijque Falcones maiores quaſuis aues aggrediantur. Hinc fit, vt Falco pedis cærulei, cùm è ſublimi deorſum ſe præcipitare, & in prædam impetu ferri debet, propter metum loco maneat, & alis ſuſpendatur. Diſciplina tamen, & induſtria hominis eum iuuantis audacior fit: verùm non ita vt nobiles Falcones, à quorum excellentia multùm declinat. Nam vt milites quandoque etſi parum robuſti, ſcientia tamen & vſu militandi, confligendiq; inſtructi, & ſociorum fiducia animati, ſępe claras victorias referunt. Sic Falco Cyanopus vſu deijciendi, tenendiq; aues, & Falconarij ſibi propinqui fiducia meliùs, & audaciùs ferit, quàm per naturam faceret, vt Niſus quoq; ſeu Sparuerius. Itaq; etiam fortiores ſe inuadit, & maiores aues. Nec mirùm, cùm etiam Lanarij (qui natura adeò timidi, tardiq; ſunt, vt nõ niſi mures, aut aues volandi adhuc impotes, vel quæ fortè humi currunt, vel in nido iacent, capiant) eodem modo ad audaciã erudiantur. Qua verò ratione audacia in Accipitribus excitetur, explicatum eſt ſuo loco.

*Quas aues capiat Cyanopus*

# DE FALCONE CYANOPODE ALIO. Cap. XV.

*Quas aues capiat*

LONGE verò aliud, ac diuerſiſſimum ab eo, quem iam ex Alberto dedimus, Cyanopodis genus illud eſt, q́d in Heluetiæ multis locis reperiri tradit Stumpfius. Ab hoc enim etiam Ornithologo Heluet teſte, aiunt capi, nõ ſolùm Perdices, Columbas, Cornices, Arcuatas, Anates, ſed etiã Phaſianos, & Tetraones. Vnde generoſiore aliqua proſapia ortum eſſe facilè liquet. Nidificat, vt ait Stumpfius, in excelſis quibuſdam petris, iuxta aquas, aut valles profundas, cùm alibi, tùm præcipuè circa oppidum, quod tribunal Cæſaris vocant. Nidis exemptus manſuefit. Bimus aucupio auctior eſt. De hoc exſtat apud Germanos prouerbiũ huiuſmodi, Ein eule hecket kein blafuoſs, hoc eſt. Vlula non generat Cyanopodem Falconem. Eundem habet ſenſum, quem illud: E Squilla roſa non naſcitur.

*Prouerbia*

# DE FALCONIBVS PROMISCVO coitu genitis. Cap. XVI.

## ORDO. SYNONIMA.

ADVLTERINI quodammodo, & non vnius generis parentibus orti Falcones vltimo loco recenſendi veniunt, quos mixtos alij vocant: Latinè Hybridas dixeris. Itali, vt Carcanus, ex altero parente Peregrino, altero Mõtano procreatos peculiariter, Falcones trauerſos vocant.

*Falcones mixti. Hybridæ Falcones trauerſi.*

## GENERA. DIFFERENTIÆ.

PRæter modò dictũ Italorũ trauerſorum Falconum genus, alia ab Alberto quaterna his enumerãtur verbis. Quũ quodlibet ex prædictis generibus cuilibet permiſceatur, multa fiunt Falconũ genera, ex quibus ad nos peruenerant quatuor. Falco .n. peregrinus frequẽter miſcetur cũ illo, cui pedes cęrulei. Q́d ſi Falco naſcatur ex peregrino patre, & matre pedũ cæruleorũ, patriſſat plerumq;, parũ declinat a nobilitate, licet parum coloris cærulæi in

*Peregrin⁹ cum quo Falcone miſcetur.*
