Descriptio. In summa speculum rostro impedit: temperies ei calidissima; quod inde innotescit, quia semper se aqua immersit. Ingenio est mansuetissimo, cibum e manibus oblatum accipit. Haec ille de eius natura. Forma verò haec est. Cirri in capite figura trigona coccinei, quo patet colore collum, pectus, & venter resplendit. Alarum extremitates non tam intensè purpurascunt, quemadmodum neque cauda, qua pro corporis portione longiuscula est, palmum scilicet aliquantulum surrecta, lata digitum auricularem, ut pictura ostendit Tibiae breues, & albantes, vngues robusti, & nonnihil incurvi. Auis tota à capite ad caudæ extremitatem mensurata duos palmos explet,

Coccothraustes Indica cum ceraso auium.
