acarus, qui trium dierum spatio in doliolum fulcum immutatus, elapsis quatuordecim diebus in talem, qualem infra delineavi, muscam transformatus fuit.

In extremitate, folii viridis eruca virescens exhibetur, turbata, filo deorsum, eodemque mediante iteratò sursum fertur, hisce foliis eam enutrivit, ad duodecimum usque Junii diem, ex tunc in nympham flavescens transit, ex qua die vigesima sextâ Julii, qualis in folio depingitur, musca nigricans educta fuit.

### VIII. *Taraxacon.*

Super Sylvestri hocce flore in mensè Aprili deprehenditur eruca fusci corporis, in capite duo quasi pilosa cornua gestat, ut & in dorso quinque adhuc ejusmodi fasciculos exstantes, cæterum corpus pilis flavis obsitum est; in principio mensis Maii telam ovalem propriis è pilis conficit, & in aureliam fuscam pilis flavis obsitam, ut infra vides, immutatur, in fine mensis ejusdem inde phalæna cinerea producta fuit, uti superius in folio videtur.

### IX. *Cerasa acida rubra flore plena.*

Erucam hanc super omni genere fructiferarum arborum, præcipuè tamen cerasorum est reperire, Metamorphosin fubitura parat ovalis figuræ texturam, argenti more splendendam, & instar chartæ pergamenæ quodammodò tabulosam, huic inclusa fuscam in aureliam transformatur, qualem diversa duo folia exhibent, post quatuordecim dies, phalæna cinerei coloris indè prodit, qualis superius super hocce ramulo volitans exhibetur.

### X. *Flos grossulariæ, Sativæ, Spinose.*

In mensè Aprili hac super arbusculâ genus quoddam erucarum corpore fuscæ, striis nigris albisque maculis aspersarum invenitur, testudineo gradu incedunt, mensè Junio rusam sibi ovalis figuræ telam texentes fuscam in aureliam immu-
