

## Werk

**Titel:** Erucarum ortus, alimentum et paradoxa metamorphosis  
**Autor:** Merian, Maria Sibylla  
**Verlag:** Oosterwyk  
**Ort:** Amstelædami  
**Jahr:** 1717  
**Kollektion:** Zoologica  
**Digitalisiert:** Niedersächsische Staats- und Universitätsbibliothek Göttingen  
**Werk Id:** PPN476830389  
**PURL:** <http://resolver.sub.uni-goettingen.de/purl?PPN476830389>  
**OPAC:** <http://opac.sub.uni-goettingen.de/DB=1/PPN?PPN=476830389>

**LOG Id:** LOG\_0032  
**LOG Titel:** XXV. Fructus gorssulariae fativae, spinosae  
**LOG Typ:** chapter

aliquot diebus ex eâ quinque erepebant acari , in doliola alba transeuntes , hæc autem memorata doliola contexebat eruca, periiitque ; post dies quatuordecim quovis è doliolo parva musca prorupit.

**X X I I .** *Cerasus major fructu subdulci.*

**P**Er elegantis hujus erucæ dorsum nigra gemmis quasi intertexta vincula obliquè ferebantur , hisce foliis eam enutri vi , aliquandò deficiente pabulo , sibimet ipsis invicem esca fuere ; mense Julio ovalis figuræ telam argenti more fulgidam confidentes in aurelias immutabantur , Augusto phalenæ elegantes colore nigro , albo , cinereo , auriaco , roseoque colore præditæ , prodibant.

Supra cerasum erucula formosa celerrimi gressūs exhibetur , in Augusti principio fuscam in aureliam immutata , tandem in fine mensis ejusdem papilio , facta est , qualem figura repræsentat.

**X X I V .** *Rosa maxima multiplex.*

**H**occe erucularum viride genus nigris constans capitibus , pediculos , calycesque , eodem , quo in inferiore rosæ calyce conspicis , modo , internè exedit , tactæ filo descendunt , eodemque mediante reascendunt , in fine Maii in aurelias fuscas immutantur , elapo quatuordecim dierum spatio fulgurantes ut aurum , volatu celeres , turbati dexterimè sub folia sese recipiendi , peritissimi papiliones inde prodeunt.

**X X V .** *Fructus grossularie , Spinosæ.*

**I**Ngens in folio , propemodùm erecta demonstratur eruca , tacta , parte corporis superiore huc illuc agitatur , trunculis posterioribus ita firmiter adhæret , ut illæsa vix aut ne vix quidem exsolvi possit ; in finem usque Maii eam enutrivi , tunc in aureliam fuscā invertebatur , elapo quatuordecim dierum spatio , albi , fusi , maculisque variis aspersi papiliones inde prorumpebant , quales inferior figura exhibit.

B

Fruc-

Fructui ericula insidet in medio viridis, in parte verò corporis posteriore, anterioreque flavis, nigrisque punctis distincta; fructui huic non mediocre damnum infert, repetitis vicibus exuvias deponit, venustiori continuo metamorphose elegantior facta sub finem Maii degenerat in nympham, trium septimanarum spatio muscæ flavæ prodeunt, uti latus habet.

### XXVI. *Urtica urens major.*

**H**Æc herba nigricantis erucæ pabulum est, quasdam earum in scatulâ reservavi, quæ decimo quarto die Junii operculo adhærebant, in aurelias expallido flavas inversarum unam aperui curiositate stimulata, figuræ è folio pendentis inferiùs correspondebat, vigesimo octavo die ejusdem mensis papilio inde prodibat, cujus latus exterius fuscum, interiùs autem ex obscurò auriaci coloris erat, nigro purpureoque mirifice exornatum. Ex aureliarum maximâ musca nigra graveolens exhibat, qualis, suprà aureliam folio insidens est depicta.

Acaros etiam in excrementis harum erucarum deprehendi in doliola nigra mutatos, in quatordecim dierum spatio, quales exhibentur, in lucem muscæ prodibant.

### XXVII. *Salix acuto folio.*

**I**N pendulo longiore foliø animalculum flavum punctis nigris intertextum exhibetur, decimâ quartâ die Junii folio adhærebat, & in nympham degeneravit, præterlapsis quindecim diebus, prodibat inde scarabæus, qualis folio superiùs insidet, qui semen suum adhuc in hæc folia disseminat, ex quo alias rursus animalcula producuntur.

Folium inferius eruculam fuscam exhibet, hisce foliis eam enut rivi, sextâ die Junii telam confecit, & in eâ, in sequentis anni mensem usque Majum permanxit, tunc talis inde musca prodiit, qualis infrà depingitur.

### XXVIII. *Rosa vericolor.*

**S**Padicea rosæ insidens eruca ventre suo graditur tribus solummodo trunculis anteriùs instructa, hisce rosis in finem usque
