XXXIV. *Hædera terrestris florens.*

Hæcce herba virentis hujus erucæ pabulum est, tacta circumvolvitur, diuque circumvoluta jacet immobilis, in fine julii transfiguratur & Augusto mense phalæna excluditur, cujus alæ lignei coloris, superiores autem lineis viridibus exornatæ sunt.

XXXV. *Iris Hortensis Latifolia.*

Super hacce durâ viridi fronde hujuscemodi virides erucas inveni, quâ certo temporis spatio illas enutrivî, his aliquando neglexeram escam præbere, ubi semetipsas edendo confumebant, recuperato tamen ordinario pabulo ab effrænata rabie destiterunt, gressûs erant celeris, octobre mense metamorphosin subibant, anni sequentis mense martio fuscæ prodiere phalænæ, quarum alas ambas alba macula notaverat.

XXXVI. *Plantago major.*

Hæcce folia viridis & tardigradæ admodum erucæ pabulum sunt, hac herbâ illam in augustum usque mensem enutrivî, ubi in aureliam fuscam immutabatur, ex quâ mense decembre phalæna fusca infra figurata prodiit.

XXXVII. *Grossularia hortensis majore fructu rubro.*

Ejusmodi erucas virides hisce super arbusculis inveni, foliisque in principium usque decembris enutrivî, ubi in aurelias spadicei coloris immutabantur, sequentis anni mense februario elegans alba, lineisque nigris strigata phalæna inde prodiit, ovula pariens subviridia.

XXXVIII. *Fœniculum Hortense.*

Super hacce stirpe eruca formosa reperitur, per universum viridis, vinculis nigris instar holoserici, colore auriaco
