XV. *Carduus Mariae.*

HÆc eruca *Carduo* præfente tanquam pabulo vefcitur in decimam nonam ufque diem Julii, Harum erucarum una mutabatur in aureliam, cæteræ jacebant immotæ, è quibus vermiculi quàm plurimi prorepebant, ovulis feſe parvulis intextentes, interim ovula omnia circum circâ contexebat in unum eruca, ne quædam deciderent; textura hæc goſſipium referebat. Poſt decem dies hujusmodi nigræ muſcæ fuerunt educæ, ita ut dubio procul omni remoto ſua ſemina in erucam muſcæ effuderint. Septimâ Auguſti formoſus ille papiliunculus ex aureliâ prodiit, quem amatores *Carduelem* vocitant.

XVI. *Atriplex.*

HAcce herbâ erucam hanc in decimam ufque diem Auguſti menſis enutrivi, ubi nigram in aureliam immutata, tandem vigemâ quartâ dicti menſis in phalænulam rubicundam transformata fuit.

XVII. *Avellana.*

Vermem infimum viridem ſuper hiſce nucibus inveni, ubi exilia quædam animalcula ſive pediculos depaſcebatur; vigefimâ quartâ Maii fuſcam in aureliam immutabatur, unde vigefima die Junii nigricans hujusmodi ſupra nuceſ exhibitum animalculum prodiit.

Supremam viridem eruculam tertîâ die Maii ſuper hiſce nucibus pari modo reperi, nucibus adhærentia folia contexebat, quibus immorata celerrimè jam excurrerat, jam in hæc iteratò ſeſe citiſſimè recipiebat, tacta filo deſcendebat, talis in decimum quartum ufque diem dicti menſis permanens in aureliam immutabatur, ac tandem, qualis ſuprà repræſentatur, hujusmodi, papiliunculus indè prodiit.

Viridis hujus generis erucas, quarum una proſuſ infra repit, ſuper hocce fructu quàm plurimas inveni, ejuſdemque foliis

enu-
