currens, sèrè jejuna. Quartâ Maii cinereâ texturâ sibi paratâ, vigesimâ quartâ dicti mensis hujusmodi cinereum in phalænam immutata fuit.

Fusca è regione erucula hisce foliis etiam vescens eisdem quoque fuit involuta, vigesimâ sextâ Junii in aureliam immutabatur, ac decimâ quartâ Julii papiliunculus ille cinereus inde prodiit.

XXV. *Cotoneæ folia.*

HUjusmodi fuscas, flavasque erucas cotoneæ foliis enutrivi, prunorum quoque ac rosarum foliis vescebantur in vigesimam octavam usquè diem Maii, ubi una depositis exuviis in aureliam immutabatur, vigesimâ quartâ Martii subsequentis anni, hujusmodi, qualis in uno latere cùm cæteris conspicitur, phalænula lignei coloris indè prodiit; cæterum hæ erucæ contrectatæ prorsus immotæ jacent.

Erucam è regione, pruni sylvestris, cotoneæque foliis enutrivi, paucò vescebatur pabulo; ultimâ Maii fuscam in aureliolam immutabatur, ac vigesimâ die Junii cinereus hujusmodi papiliunculus, suprà volitans, indè prodiit.

XXVI. *Flos cariophillorum.*

Super hocce flore similes lineis rubris virgatas eruculas inveni, quo Norimbergæ eas in duodecimam usquè diem Maii nutrivi, extunc floribus sese intexentes in aurelias immutabantur, undè vigesimâ dicti mensis, hujusmodi, ochræ colore tincti scarabæoli, quorum unus suprà florem cernitur, educti fuerunt.

Qualis viridi folio insidet, talis Amstelodamum allata mihi fuit eruca flava lineis nigris virgata, quæ vix à me vigesimâ secundâ Junii depicta subito sese intexuit, vigesimâ die Julii sequentis indè hujusmodi phalænula prodiit.

XXVII.
