hujuſmodi phalænula, qualis ſuprà cernitur, inde prodiit.

XXXIV. *Anemone.*

HOſce flores his erucis in ornatum addidi, cum in præcedente folio trifolium, & carex in gramine creſcentia fuerint exhibita. Carex harum erucarum pabulum fuit in octavam uſque Junii diem, ubi in aurelias, ac indè vigeſimâ octava Julii in hujuſmodi flavas phalænulas immutatæ fuerunt.

XXXV. *Gramen virgineum.*

HAnc flori inſidentem erucam hic collocavi proprium ei pabulum ignorans; vix enim à me depicta ſeſe die Junii octavâ 1705. ovo albicanti intexuit, ac vigeſimâ octavâ menſis antdeicti hujuſmodi phalænula inde prodiit. Vermis inſiſis ſtiqiti irrepens exilibus in omni plantarum genere reperibilibus pediculis paſcitur; vigeſimâ ſextâ Junii, qualis ſub verme cernitur, formam aſſumpſit, duodecim diebus elapſis hujuſmodi ſcarabæolus inde prodiit.

XXXVI. *Salix.*

INgentes hæ erucæ fœtidum ſpargunt odorem; in ſalice morantur, ejuſdem medullam depaſcentes; pabulo verò carentes ſemetipſas invicem devorant; nec in ullâ ſcatulâ, lignum quodvis erodentes, aſſervari poſſunt, vigeſimâ Aprilis nonnullæ ſeſe intexentes, quartâ die Maii, quales hic exhibentur, (mas ſcilicet atque femella) phalænæ factæ ſunt; aliam quoque vigeſimâ Septembris acquiſivi, hæc in terrâ, nullam aſſumens eſcam in Octobrem uſque recondita in aureliam immutata fuit; decimâ ſeptimâ Maii ſubſequentis anni hujuſmodi phalæna inde prodiit, quæ primâ die centum quinquaginta octo, ſecundâ adhuc ſeptuaginta octo ova peperit, ubi in fuſcum colorem vergente corpore tertiâ die periit.
