hujusmodi phalænula, qualis suprâ cernitur, inde prodiit.

XXXIV. *Anemone.*

HOsce flores his erucis in ornatum addidi, cum in præcedente folio trifolium, & carex in gramine crescentia fuerint exhibita. Carex harum erucarum pabulum fuit in octavam usque Junii diem, ubi in aurelias, ac indè vigesimâ octava Julii in hujusmodi flavas phalænulas immutatæ fuerunt.

XXXV. *Gramen virginicum.*

HAnc flori insidentem erucam hic collocavi proprium ei pabulum ignorans; vix enim à me depicta sese die Junii octavâ 1705. ovo albicanti intexuit, ac vigesimâ octavâ mensis antedicti hujusmodi phalænula inde prodiit. Vermis infimus stiqiti irrepens exilibus in omni plantarum genere reperibilibus pediculis pascitur; vigesimâ sextâ Junii, qualis sub verme cernitur, formam assumpsit, duodecim diebus elapsis hujusmodi scarabæolus inde prodiit.

XXXVI. *Salix.*

INgentes hæ erucæ foetidum spargunt odorem; in salice morantur, ejusdem medullam depascentes; pabulo verò carentes semetipsas invicem devorant; nec in ullâ scatulâ, lignum quodvis erodentes, asservari possunt, vigesimâ Aprilis nonnullæ sese intexentes, quartâ die Maii, quales hic exhibentur, (mas scilicet atque femella) phalænæ factæ sunt; aliam quoque vigesimâ Septembris acquisivi, hæc in terrâ, nullam assumens escam in Octobrem usque recondita in aureliam immutata fuit; decimâ septimâ Maii subsequenter anni hujusmodi phalæna inde prodiit, quæ primâ die centum quinquaginta octo, secundâ adhuc septuaginta octo ova peperit, ubi in fuscum colorem vergente corpore tertiâ die perit.

XXXVII.
