XLVIII. *Chalthæ.*

FLava hæc eruca malorum foliis in mensẽm usque Septembrem enutrita fuit; decimã quintã Junii subsequẽntis anni fuscã prius in aureliã immutata, phalæna facta est. Hujusmodi animalcula, quorum unum viridi folio insidet, pediculis plantarum exilibus tanquam pabulo vescuntur; in principio Junii mutabantur in aurelias, sub finem hujus mensis hujusmodi scarabæi inde prodibant flavi.

Fuscum inferius animalculum in mensẽm usque Junium aquæ immoratur, in quo in terram prorepat, & exposit hujusmodi volitans animalculum, quale folio insidens exhibetur, inde producitur.

XLIX. *Flos mali punici.*

Superiorem erucã malorum foliis enutriti; anno 1699. decimã Septembris albicanti telæ sese intexuit amstelodami, aprili mensẽ subsequẽntis anni cinerea hæc phalæna inde producta fuit. Bicaudata inferior hæc eruca nullã prorsus interpositã morã sese intexuit, ita ut in ejusdem pabuli cognitionem devenire nequiverim; albã sibi texturã paratã in phalænam, qualis in flore cernitur, transfigurata fuit.

L. *Martagum.*

Ejusmodi viridia animalcula neque pabulo determinabili vescuntur, neque statuto tempore reperiuntur, omnibus in herbis omnibus anni temporibus ea est reperire, ubi cunque locorum albicans hujusmodi spuma comparet, ibidem hæcce latitant animalcula; usquequò in salientes, inferiùs unã repræsentatos scarabæolos immutentur.

Subviridis eruca malorum foliis in octobris octavam usque diẽm enutrita fuit, ubi mutabatur in aureliã, & vigesimã nonã Junii subsequẽntis anni hæcce phalæna prodiit; eruca cum phalæna superiùs exhibetur.

Infirma subviridis erucula grassularia foliis vescabatur; ejusdem
