

Werk

Titel: Applied Mechanics

Untertitel: An elementary general introduction to the theory of structures and machines ; Wit...

Autor: Cotterill, James Henry

Verlag: Macmillan

Ort: London

Jahr: 1884

Kollektion: maps

Signatur: 8 PHYS II, 1457

Werk Id: PPN616235291

GENERAL INTRODUCTION.

PART I.—STATICS OF STRUCTURES.

CHAPTER I.—FRAMEWORK LOADED AT THE JOINTS.

ARTICLE	PAGE
1. Preliminary Explanations and Definitions, - - -	1
SECTION I.—TRIANGULAR FRAMES.	
2. Diagram of Forces for a Simple Triangular Frame, - - -	3
3. Triangular Trusses, - - - - -	5
4. Cranes and Derricks, - - - - -	7
5. Sheer Legs and Tripods, - - - - -	9
6. Effect of the Tension of the Chain in Cranes, - - -	10
Examples, - - - - -	11
SECTION II.—INCOMPLETE FRAMES.	
7. Preliminary Remarks, - - - - -	13
8. Simple Trapezoidal or Queen Truss, - - - - -	13
9. General Case of a Funicular Polygon under a Vertical Load, - - -	15
10. Suspension Chains, Arches, Bowstring Girders, - - -	17
11. Suspension Chains (<i>continued</i>), Bowstring Suspension Girder, - - -	22
Examples, - - - - -	24
SECTION III.—COMPOUND FRAMES.	
12. Compound Triangular Frames for Bridge Trusses, - - -	25
13. Roof Trusses in Timber, - - - - -	28
14. Queen Truss for Large Iron Roofs, - - - - -	31
15. Concluding Remarks, Diagrams of Forces in General, - - -	33
Examples and References, - - - - -	35
CHAPTER II.—STRAINING ACTIONS ON A LOADED STRUCTURE.	
16. Preliminary Explanations, - - - - -	37

ARTICLE	PAGE
SECTION I.—BEAMS.	
17. Straining Actions on a Beam, - - - - -	38
18. Example of a Balanced Lever, General Rules, - - - - -	39
19. Beam supported at the Ends and Loaded at an Intermediate Point, - - - - -	41
20. Beam supported at the Ends and Loaded Uniformly, - - - - -	43
21. Beam Loaded at the Ends and supported at Intermediate Points, - - - - -	44
22. Application of the Method of Superposition, - - - - -	45
Examples, - - - - -	46
SECTION II.—FRAMEWORK GIRDEES.	
23. Preliminary Explanations, - - - - -	47
24. Warren Girders under Various Loads, - - - - -	50
25. N Trusses, - - - - -	54
Examples, - - - - -	54
SECTION III.—GIRDEES WITH REDUNDANT BARS.	
26. Preliminary Explanations, - - - - -	55
27. Lattice Girders, Flanged Beams, - - - - -	58
Examples and References, - - - - -	60
CHAPTER III.—STRAINING ACTIONS DUE TO ANY VERTICAL LOAD.	
28. Preliminary Remarks, - - - - -	61
29. Relation between the Shearing Force and Bending Moment, - - - - -	62
30. Application to the Case of a Loaded Beam, - - - - -	66
31. Application to a Vessel floating in Water, - - - - -	68
32. Maximum Straining Actions, - - - - -	72
Examples, - - - - -	73
33. Travelling Loads, - - - - -	73
34. Counter-Bracing of Girders, - - - - -	77
Examples, - - - - -	78
35. Method of Sections applied to Incomplete Frames, Culmann's Theorem, - - - - -	78
36. Method of Sections in General, Ritter's Method, - - - - -	80
Examples and References, - - - - -	82
CHAPTER IV.—FRAMEWORK IN GENERAL.	
37. Straining Actions on the Bars of a Frame. General Method of Reduction, - - - - -	83
38. Hinged Girders, Virtual Joints, - - - - -	85
39. Hinged Arches, - - - - -	88
40. Structures of Uniform Strength, - - - - -	89
41. Stress due to the Weight of a Structure, - - - - -	91
42. Straining Actions on a Loaded Structure in General, - - - - -	94
43. Framework with Redundant Parts, - - - - -	95
44. Concluding Remarks, - - - - -	96
Examples, - - - - -	96
PART II.—KINEMATICS OF MACHINES.	
45. Introductory Remarks, - - - - -	99

CONTENTS.

ix

CHAPTER V.—LOWER PAIRING.

ARTICLE		PAGE
46.	Definition of Lower Pairs, - - - - -	101
47.	Definition of a Kinematic Chain, - - - - -	103
48.	Mechanism of a Direct-Acting Engine, - - - - -	105
49.	Velocity of Piston, - - - - -	108
	Examples, - - - - -	111
50.	Mechanisms derived from the Slider Crank Chain, - - - - -	113
51.	Double Slider Crank Chains, - - - - -	119
52.	Crank Chains in General, - - - - -	122
53.	Diagram of Velocities in Linkwork, - - - - -	123
54.	Screw Chains, - - - - -	125
55.	Parallel Motions derived from Crank Chains, - - - - -	126
56.	Closure of Kinematic Chains, - - - - -	131
	Examples and References, - - - - -	132

CHAPTER VI.—CONNECTION OF TWO LOWER PAIRS BY HIGHER PAIRING.

SECTION I.—TENSION AND PRESSURE ELEMENTS.

57.	Preliminary Remarks, Tension Elements, - - - - -	135
58.	Simple Pulley Chain, Blocks and Tackle, - - - - -	137
59.	Wheel and Axle, - - - - -	139
60.	Pulley Chains with Friction Closures, Belts, - - - - -	141
61.	Shifting of Belts, Fusee Chain, - - - - -	143
62.	Simple Hydraulic Chain, - - - - -	143
	Examples, - - - - -	143

SECTION II.—WHEELS IN GENERAL.

63.	Higher Pairing of Rigid Elements, - - - - -	145
64.	Rolling Contact, - - - - -	146
65.	Augmentation of a Chain, Trains of Wheels, - - - - -	149
66.	Wheel Chains involving Screw Pairs, - - - - -	151
	Examples, - - - - -	153

SECTION III.—TEETH OF WHEELS.

67.	Preliminary Explanations, - - - - -	154
68.	Involute Teeth, - - - - -	155
69.	Path of Contact, the Pitch Circle, - - - - -	158
70.	Path of Contact, any Circle, - - - - -	160
71.	Addendum and Clearance of Teeth, - - - - -	162
72.	Endless Screw and Worm Wheel, - - - - -	163
	Examples, - - - - -	164

SECTION IV.—CAMs AND RATCHETS.

73.	Reduction of a Crank Chain by omission of the Coupling Link, - - - - -	164
74.	Cams with Continuous Action, - - - - -	167
75.	Mechanisms with Intermittent Action, - - - - -	168
76.	Ratchets, - - - - -	169
77.	Other Forms of Ratchet Mechanisms, - - - - -	171
78.	Screw Cams, - - - - -	172
	Examples, - - - - -	173

CHAPTER VII.—MECHANISM IN GENERAL.		PAGE
ARTICLE		
79.	Plane Motion in General, Centroids, - - - -	174
80.	Axoids, Elementary Examples of Centroids, - - - -	176
81.	Profiles for given Centroids, - - - -	179
82.	Centroid for a Higher Pair connecting Lower Pairs, - - - -	180
83.	Construction of Centres of Curvature of Profiles, Willis's Method, - - - -	182
84.	Sphere Motion, - - - -	184
85.	Screw Motion, - - - -	184
86.	Classification of Simple Kinematic Chains, - - - -	185
87.	Compound Kinematic Chains, - - - -	186
PART III.—DYNAMICS OF MACHINES.		
CHAPTER VIII.—PRINCIPLE OF WORK.		
SECTION I.—BALANCED FORCES (STATICS).		
88.	Preliminary Explanations, Definition of Work, - - - -	192
89.	Oblique Resistance, - - - -	193
90.	Variable Resistance, - - - -	195
91.	Resistance to Rotation, Stability of a Vessel, - - - -	196
92.	Internal and External Work, - - - -	199
93.	Energy, Principle of Work, - - - -	199
94.	Machines, - - - -	202
95.	Verification of the Principle of Work in Special Examples, - - - -	203
96.	Periodic Motion of Machines, - - - -	206
97.	Power, Sources of Energy, - - - -	206
98.	Reversibility, Conservation and Storage of Energy, - - - -	207
	Examples, - - - -	208
SECTION II.—UNBALANCED FORCES (KINETICS).		
99.	Kinetic Energy of a Particle, - - - -	209
100.	Partially Unbalanced Forces, Principle of Work, - - - -	211
101.	Kinetic Energy of the Moving Parts of a Machine, - - - -	212
102.	Conservation of Energy, - - - -	215
103.	Examples of the Principle of Work, - - - -	216
	Examples and References, - - - -	218
CHAPTER IX.—DYNAMICS OF THE STEAM ENGINE.		
104.	Construction of Polar Curves of Crank Effort, - - - -	220
105.	Construction of Linear Curves of Crank Effort, - - - -	220
106.	Ratio of Maximum and Minimum Crank Effort to Mean, - - - -	224
107.	Fluctuation of Energy, - - - -	225
108.	Fluctuation of Speed, Fly Wheels, - - - -	230
109.	Correction of Indicator Diagram for Inertia of Reciprocating Parts, - - - -	234
110.	Construction of Curves of Crank Effort for any given Indicator Diagram, - - - -	239
111.	Periodic Motion of Machines in General, - - - -	241
	Examples, - - - -	242

CONTENTS.

CHAPTER X.—FRICTIONAL RESISTANCES.

ARTICLE	PAGE
112. Preliminary Remarks, - - - - -	245
SECTION I.—EFFICIENCY OF LOWER PAIRING.	
113. Ordinary Laws of Sliding Friction, - - - - -	245
114. Friction of Bearings, - - - - -	246
115. Friction of Pivots, - - - - -	249
116. Friction and Efficiency of Screws, - - - - -	250
117. Efficiency of Mechanism by Exact Method, - - - - -	253
118. Efficiency of Mechanism by Approximate Method, - - - - -	254
119. Experiments on Sliding Friction (Morin), - - - - -	255
120. Limitations to the Ordinary Laws in Plane Surfaces, - - - - -	257
121. Experiment on Axle Friction, - - - - -	258
SECTION II.—EFFICIENCY OF HIGHER PAIRING.	
122. Rolling Friction, - - - - -	259
123. Friction of Ropes and Belts, - - - - -	261
124. Driving Belts, - - - - -	263
125. Slip of Belts, - - - - -	264
126. Stiffness of Ropes, - - - - -	265
127. Friction of Toothed Wheels and Cams, - - - - -	266
SECTION III.—FRICTIONAL RESISTANCES IN GENERAL.	
128. Efficiency of Mechanism in General, - - - - -	268
129. Friction Brakes, - - - - -	270
Examples and References, - - - - -	271

CHAPTER XI.—INCOMPLETE CONSTRAINT. STRAINING ACTIONS ON MACHINES.

130. Preliminary Remarks, - - - - -	273
SECTION I.—ELEMENTARY PRINCIPLES OF DYNAMICS.	
131. Impulse and Momentum, - - - - -	274
132. Centrifugal Force, - - - - -	275
133. Principle of Momentum, - - - - -	276
134. Internal and External Kinetic Energy, - - - - -	278
135. Examples of Incomplete Constraint, - - - - -	278
Case I. Recoil of a Gun, - - - - -	279
Case II. Collision of Vessels, - - - - -	279
SECTION II.—CENTRIFUGAL REGULATORS.	
136. Preliminary Remarks, - - - - -	281
137. Simple Revolving Pendulum, - - - - -	281
138. Speed of a Governor to overcome given Frictional Resistances, Loaded Governors, - - - - -	282
139. Variation of Height of a Governor by a Change of Position of the Arms, - - - - -	284
140. Parabolic Governors, - - - - -	286
141. Stability of Governors, - - - - -	286

SECTION III.—STRAINING ACTION ON THE PARTS OF A MACHINE.		PAGE
ARTICLE		
142.	Transmission of Stress in Machines, - - - - -	288
143.	Dynamometers, - - - - -	290
144.	Stability of Machines, Balancing, - - - - -	291
145.	Straining Actions on the Parts of a Machine due to their Inertia, - - - - -	293
146.	Virtual Machines, - - - - -	294
	Examples, - - - - -	295
PART IV.—STIFFNESS AND STRENGTH OF MATERIALS.		
147.	Introductory Remarks, - - - - -	298
CHAPTER XII.—SIMPLE TENSION, COMPRESSION, AND BENDING OF PERFECTLY ELASTIC MATERIALS.		
SECTION I.—TENSION AND COMPRESSION.		
148.	Simple Tension, - - - - -	301
149.	Work done in Stretching a Rod, - - - - -	303
150.	Thin Pipes and Spheres under Internal Fluid Pressure, - - - - -	304
151.	Remarks on Tension, - - - - -	307
152.	Simple Compression, - - - - -	307
	Examples, - - - - -	308
SECTION II.—SIMPLE BENDING.		
153.	Proof that the Stress at each Point varies as its Distance from the Neutral Axis, - - - - -	309
154.	Determination of the Position of the Neutral Axis, - - - - -	311
155.	Determination of the Moment of Resistance, - - - - -	312
156.	Remarks on the Theory of Bending, - - - - -	314
157.	Calculation of Moments of Inertia, - - - - -	315
158.	Beams of I Section with Equal Flanges, - - - - -	316
159.	Ratio of Depth to Span in I Beams, - - - - -	317
160.	Proportion of I Beams for Equal Strength, - - - - -	318
161.	Beams of Uniform Strength, - - - - -	321
162.	Unsymmetrical Bending, - - - - -	322
	Examples, - - - - -	323
CHAPTER XIII.—DEFLECTION AND SLOPE OF BEAMS.		
163.	Deflection due to the Maximum Bending Moment, - - - - -	326
164.	General Equation of Deflection Curve, - - - - -	328
165.	Elementary Cases of Deflection and Slope, - - - - -	328
166.	Beam propped in the Middle, - - - - -	330
167.	Beam fixed at the Ends, - - - - -	331
168.	Stiffness of a Beam, - - - - -	333
169.	General Graphical Method, - - - - -	334
170.	Examples of Graphical Method, - - - - -	335
171.	Resilience of a Bent Beam, - - - - -	337
	Examples, - - - - -	338

CHAPTER XIV.—TENSION OR COMPRESSION COMPOUNDED WITH BENDING.
CRUSHING BY BENDING.

ARTICLE	PAGE
172. General Formula for the Stress due to a Thrust or a Pull in Combination with a Bending Moment, - - - - -	340
173. Strut or Tie under the action of a Force parallel to its Axis in cases where Lateral Flexure may be neglected, - - - - -	340
174. Effect of a Thrust on a Loaded Beam, - - - - -	342
175. Remarks on the Application of the General Formula, - - - - -	343
176. Straining Actions due to Forces normal to the Section, - - - - -	343
177. Maximum Crushing Load of a Pillar, - - - - -	343
178. Manner in which a Pillar crushes. Formula for Lateral Deviation, - - - - -	347
179. Augmentation of Effect of Load by Lateral Deviation, - - - - -	348
180. Gordon's Formula, - - - - -	350
181. Collapse of Flues, - - - - -	352
Examples, - - - - -	354

CHAPTER XV.—SHEARING AND TORSION OF PERFECTLY ELASTIC MATERIAL.

182. Distinction between Tangential Stress and Normal Stress. Equality of Tangential Stress on Planes at Right Angles, - - - - -	355
183. Tangential Stress equivalent to a Pair of Equal and Opposite Normal Stresses. Simple Distorting Stress, - - - - -	356
184. Torsion of a Shaft, - - - - -	360
185. Diameter of a Shaft to transmit a given Power, - - - - -	362
186. Distance apart of Bearings, - - - - -	363
187. Web of a Beam of I Section, - - - - -	364
188. Distribution of Shearing Stress on the Section of a Beam, - - - - -	366
189. Deflection due to Shearing, - - - - -	368
190. Weakening of Beams by Insufficient Resistance to Longitudinal Shearing of the Web, - - - - -	369
191. Joints and Fastenings, - - - - -	369
Examples, - - - - -	371

CHAPTER XVI.—IMPACT.

192. Preliminary Remarks. General Equation of Impact, - - - - -	374
193. Augmentation of Stress by Impact in Perfectly Elastic Material, - - - - -	376
194. Sudden Application of a Load, - - - - -	377
195. Action of a Gust of Wind on a Vessel, - - - - -	378
196. Impact at High Velocities. Effect of Inertia, - - - - -	379
197. Vibrating Loads. Synchronism, - - - - -	382
198. Impact when the Limits of Elasticity are not exceeded. Resilience, - - - - -	384
Examples, - - - - -	386

CHAPTER XVII.—STRESS, STRAIN, AND ELASTICITY.

SECTION I.—STRESS.

199. Ellipse of Stress, - - - - -	387
200. Principal Stresses. Axes of Stress, - - - - -	389
201. Varying Stress. Lines of Stress. Bending and Twisting of a Shaft, - - - - -	390

ARTICLE	PAGE
202. Straining Actions on the Web of an I Beam, - - -	392
203. Remarks on Stress in General, - - -	393
Examples, - - - - -	394

SECTION II.—STRAIN.

204. Simple Longitudinal Strain. Two Strains at Right Angles, - -	395
205. Comparison between Stress and Strain, - - - - -	397

SECTION III.—CONNECTION BETWEEN STRESS AND STRAIN.

206. Equations connecting Stress and Strain in Isotropic Matter, - -	398
207. Elasticity of Form and Volume, - - - - -	399
208. Modulus of Elasticity under Various Circumstances. Elasticity of Flexion, - - - - -	400
209. Thick Hollow Cylinder under Internal Pressure, - - - - -	403
210. Strengthening a Cylinder by Rings. Effect of great Pressures, - -	406
Examples, - - - - -	407

CHAPTER XVIII.—MATERIALS STRAINED BEYOND THE ELASTIC LIMIT.

STRENGTH OF MATERIALS.

211. Plastic Materials, - - - - -	409
212. Flow of Solids, - - - - -	411
213. Preliminary Remarks on Materials. Stretching of Wrought Iron and Steel, - - - - -	412
214. Real and Apparent Strength of Ductile Metals, - - - - -	415
215. Increase of Hardness by Stress beyond the Elastic Limit, - - -	417
216. Compression of Ductile Materials, - - - - -	418
217. Bending beyond the Elastic Limit, - - - - -	420
218. Stretching of Cast Iron, - - - - -	421
219. Crushing of Rigid Materials, - - - - -	423
220. Breaking of Cast Iron Beams, - - - - -	423
221. Shearing and Torsion, - - - - -	424
222. Theories of Compound Strength, - - - - -	426
223. Connection between the Co-efficients of Strength for Shearing and Tension, - - - - -	427
224. Wöhler's Experiments on Alternate Bending and Twisting, - - -	428
225. Influence of Fluctuation of Stress, - - - - -	430
226. Impact, - - - - -	432
227. Factors of Safety and Co-efficients of Working Strength, - - -	433
228. Values of Co-efficients, - - - - -	434
229. Fibrous Materials. Ropes, - - - - -	435
230. Tables of Strength, - - - - -	438
Examples, - - - - -	439
Description of Plate VIII. - - - - -	441

PART V.—TRANSMISSION AND CONVERSION OF ENERGY BY FLUIDS.

231. Introductory Remarks, - - - - -	442
--------------------------------------	-----

CONTENTS.

XV

CHAPTER XIX. ELEMENTARY PRINCIPLES OF HYDRAULICS.

ARTICLE		PAGE
232.	Velocity due to a given Head, - - - - -	444
233.	Frictional Resistances in General, - - - - -	447
234.	Discharge from Small Orifices, - - - - -	448
235.	Incomplete Contraction, - - - - -	449
236.	Discharge from Large Orifices in a Vertical Plane, - - - - -	450
237.	Head relatively to Moving Orifices, - - - - -	452
238.	Steady Flow through Pipes. Conservation of Energy, - - - - -	452
239.	Distribution of Energy in an Undisturbed Stream. Vortex Motion, - - - - -	454
240.	Viscosity, - - - - -	456
241.	Surface Friction in General, - - - - -	457
242.	Surface Friction in Pipes, - - - - -	460
243.	Discharge of Pipes, - - - - -	461
244.	Open Channels, - - - - -	462
245.	Virtual Slope of a Pipe, - - - - -	463
246.	Loss of Energy by Eddies and Broken Water, - - - - -	464
247.	Bends in a Pipe. Surface Friction, - - - - -	469
248.	Summation of Losses of Head, - - - - -	469
249.	Resistance of Deeply Immersed Bodies. Ships at Low Speeds, - - - - -	471
250.	Direct Impulse and Reaction, - - - - -	474
251.	Oblique Action. Curved Surfaces, - - - - -	476
252.	Impulse and Reaction of Water in a Closed Passage, - - - - -	478
	Examples, - - - - -	479

CHAPTER XX.—HYDRAULIC MACHINES.

253.	Hydraulic Motors in General, - - - - -	483
254.	Weight Machines, - - - - -	483
255.	Hydraulic Pressure Machines in Steady Motion, - - - - -	484
256.	Hydraulic Pressure Machines in Unsteady Motion, - - - - -	486
257.	Examples of Hydraulic Pressure Machines, - - - - -	489
258.	Hydraulic Brakes, - - - - -	490
259.	Transmission of Energy by Hydraulic Pressure, - - - - -	493
260.	Pumps, - - - - -	494
	Examples, - - - - -	498
261.	Impulse and Reaction Machines in General, - - - - -	500
262.	Angular Impulse and Momentum, - - - - -	503
263.	Reaction Wheels, - - - - -	504
264.	Turbine Motors, - - - - -	506
265.	Turbine Pumps, - - - - -	510
266.	Limitation of Diameter of Wheel, - - - - -	514
267.	Impulse Wheels, - - - - -	515
268.	Propellers, - - - - -	516
	Examples, - - - - -	520

CHAPTER XXI.—PNEUMATICS AND THERMODYNAMICS.

269.	Preliminary Remarks, - - - - -	522
270.	Expansive Energy, - - - - -	522
271.	Transmitted Energy, - - - - -	524
272.	Cycle of Operations in a Pneumatic Motor. Mechanical Efficiency, - - - - -	526

ARTICLE	PAGE
273. Pneumatic Pumps, - - - - -	528
274. Indicator Diagrams, - - - - -	529
275. Cycle of Thermal Operations in a Heat Engine, - - - - -	531
276. Mechanical Equivalent of Heat, - - - - -	532
277. Mechanical Value of Heat. - - - - -	533
278. Thermal Efficiency, - - - - -	535
279. Compound Engines, - - - - -	536
280. Internal Energy. Internal Work, - - - - -	537
281. Steady Flow through a Pipe. Conservation of Energy, - - - - -	540
282. Velocity of Efflux of a Gas from an Orifice, - - - - -	541
282A. Discharge from an Orifice, - - - - -	543
283. Flow of Gases through Pipes, - - - - -	545
284. Flow of Gases under Small Differences of Pressure, - - - - -	548
285. Varying Temperature. Chimney Draught, - - - - -	550
Examples, - - - - -	552

APPENDIX.

A. NOTES AND ADDENDA.

I. Statics of Structures, - - - - -	557
II. Kinematics of Machines, - - - - -	561
III. Dynamics of Machines, - - - - -	562
IV. Stiffness and Strength of Materials, - - - - -	566
V. Hydraulics and Pneumatics, - - - - -	575
B. ORGANIZATION OF THE CLASSES IN ENGINEERING AND NAVAL ARCHITECTURE IN THE ROYAL NAVAL COLLEGE, - - - - -	
ADDENDUM TO CHAPTER XIV., - - - - -	584

ERRATA AND CORRIGENDA.

PAGE 211, line 18—*for effect, read effort.*

PAGE 300, line 24—*for multiplying read dividing.*

PAGE 361—For an error in the table for strength of a shaft see Appendix, page 571.

PAGE 367, line 10 from bottom—*for y_0 read q_0 .*

PAGE 496—In Fig. 188 the letters *a* and *b* have been interchanged.
