Anthropological Society of London,

4, ST. MARTIN'S PLACE, TRAFALGAR SQUARE.

HIS SOCIETY is formed with the object of promoting the study of Anthropology in a strictly scientific manner. It proposes to study Man in all his leading aspects, physical, mental, and historical; to investigate the laws of his origin and progress; to ascertain his place in nature and his relations to the inferior forms of life; and to attain these objects by patient investigation, careful induction, and the encouragement of all researches tending to establish a *de facto* science of man. No Society existing in this country has proposed to itself these aims, and the establishment of this Society, therefore, is an effort to meet an obvious want of the times.

This it is proposed to do :

First. By holding Meetings for the reading of papers and the discussion of various anthropological questions.

Second. By the publication of reports of papers and abstracts of discussions in the form of a Quarterly Journal; and also by the publication of the principal memoirs read before the Society, in the form of Transactions.

Third. By the appointment of Officers, or Local Secretaries, in different parts of the world, to collect systematic information. It will be the object of the Society to indicate the class of facts required, and thus tend to give a systematic development to Anthropology.

Fourth. By the establishment of a carefully collected and reliable Museum, and a good reference Library.

Fifth. By the publication of a series of works on Anthropology which will tend to promote the objects of the Society. These works will generally be translations; but original works will also be admissible.

Translations of the following works are now ready. The following work was issued for 1863.

DR. THEODOR WAITZ. *Anthropology of Primitive Peoples. First Part.* Edited from the German by J. Frederick Collingwood, Esq., F.R.S.L., F.G.S., V.P. A.S.L., with corrections and additions by the Author. Price 16s.

The following works were issued in 1864.

BROCA, Dr. Paul. *On the Phenomena of Hybridity in the Genus Homo.* Edited from the French by C. Carter Blake, Esq., F.G.S., F. and Assistant Secretary A.S.L. Price 5s.

POUCHET, Georges. *On the Plurality of the Human Race.* Edited, from the French (Second Edition), by H. J. C. Beavan, Esq., F.R.G.S., F.A.S.L. Price 7s. 6d.

CARL VOGT. *Lectures on Man: his place in Creation and in the History of the Earth.* Edited by Dr. James Hunt, F.S.A., F.R.S.L., Pres. A.S.L. Price 16s.

The following is issued in the first part of the year 1865.

BLUMENBACH, J. F., *The Life, and Anthropological Treatises, of; with the Inaugural Dissertation of DR. JOHN HUNTER.* By T. Bendyshe, Esq., M.A., V.P. A.S.L. Price 16s.

The publication of the following works is contemplated:—

GASTALDI, Cavaliere Bartolomeo. *New Notes on Objects of High Antiquity found in the Turbaries and Marl Beds of Italia.* Translated from the Italian by Charles Harcourt Chambers, M.A., F.A.S.L.

RETZIUS, PROFESSOR. *The Anthropological Works of.* Edited by A. Higgins, Esq., Hon. For. Sec. A.S.L.

GRATIOLET. *Mémoire sur les Plis Cérébraux de l'Homme et des Primates.* 4to, Paris, 1855. Edited by Dr. Daniel H. Tukey.

A. DE QUATREFAGES. *Unité de l'Espèce Humaine.* Edited by G. F. Rolph, Esq., F.A.S.L. Svo. Paris, 1861.

The Anthropological Papers contained in the Comptes Rendus des Séances de l'Académie des Sciences. Edited by George E. Roberts, Esq., F.G.S., F.A.S.L.

DR. THEODOR WATZ, Professor of Philosophy in the University of Marburg. *Anthropologie der Naturvölker.* 1861. Second part. Edited by J. Frederick Collingwood, Esq., F.G.S., F.R.S.L., V.P. A.S.L.

VON BAER, KARL ERNST, *The Anthropological Works of.*

GOSSE. *Mémoire sur les Déformations Artificielles du Crâne.* Svo. Paris, 1855.

BORY DE ST. VINCENT. *Essai zoologique sur le genre humain.* 2 vols. Paris, 3rd ed., 1836. Edited by S. E. Bouverie-Pusey, Esq., F.A.S.L., F.E.S.

CRULL. *Dissertatio anthropologico-medica de Cranio, ejusque ad faciem ratione.* Svo. Gröningen, 1810.

LUCAS, PROSPER, DR. *Traité sur l'hérédité.* 2 vols.

An Encyclopædia of Anthropological Science. Edited by T. Bendyshe, Esq., M.A., V.P. A.S.L., and other Contributors.

GOBINEAU. *De l'Inégalité des Races Humaines.*

Sixth. By the appointment, from time to time, of various Committees authorised to report to the Society on particular topics which may be referred to them; the results of such investigations being in all cases communicated to the Society.

Waitz's Introduction to Anthropology.

Edited, from the FIRST VOLUME of *Anthropologie der Naturvölker*, by J. FREDERICK COLLINGWOOD, F.R.S.L., F.G.S., F.A.S.L., Foreign Associate of the Anthropological Society of Paris, Vice-President of the Anthropological Society of London.

Extract of a Letter from the Author to the Editor.

"I have received your translation of the first volume of my '*Anthropologie der Naturvölker*,' and hasten to return you my heartfelt thanks for the great care and assiduity which you have bestowed on the task. I am fully cognisant of the great difficulties you have to contend with, especially as my style, as alluded to in your preface, possesses many peculiarities, so that even German men of science consider the reading of my books rather hard work. All these difficulties you have surmounted with the greatest skill, so as to render my work, as it appears to me, into very pleasing, readable English."

OPINIONS OF THE PRESS.

"A more felicitous selection could not, we conceive, by any possibility have been made than the very one which has resulted in the publication of the book lying before us. For within the compass of the first volume of Dr. Waitz's *Anthropologie der Naturvölker* is compacted together the most comprehensive and exhaustive survey of the new science yet contributed, we believe, in any tongue to European literature. To the English public generally, however, it is a book almost unknown, saving and excepting alone by reputation. Although merely a translation from the German, therefore, the work is virtually, if not an original work, a perfectly new work to the mass of readers in this country. So far as this same rapidly executed work of translation can be compared and collated with the original, it appears to be a version singularly faithful and accurate. . . . The book, as it now appears, is a work of especial value, and also one of very peculiar interest. It thoroughly fulfils its design of affording the reader of it, within a single volume, the very best epitome anywhere to be found of what is the actual 'present state' of anthropological science in Christendom. Dr. Waitz takes a far wider range within his ken than Prichard and Nott and Gliddon combined."—*The Sun*, Dec. 14, 1863.

"The volume in every page exhibits great research; it abounds with interesting speculation, all tending the right way, and the information it presents is happily conveyed in a popular manner."—*Morning Advertiser*, Nov. 16, 1863.

"So comprehensive is the view taken by the author of all that pertains to man, that a mere enumeration even of the leading topics of the work is beyond our space, and we must content ourselves with recommending its perusal to such of our readers as are interested in the subject, with the assurance that it will well repay the trouble."—*Weekly Dispatch*, Nov. 29, 1863.

"This handsomely printed volume discusses at great length and with much ability the question as to the races of man. . . . At the hands of Dr. Waitz it has met with calm consideration, and in its English dress will prove both interesting and instructive. It displays great research, and contains a large extent of highly interesting matter."—*Liverpool Albion*, Nov. 9, 1863.

"From such a bill of fare, our readers will be able to judge that the work is one of value and interest. . . . It is of the nature of a review, arriving at a comprehensive and proportional estimate, rather than at minute accuracy of detail, such as may be sought elsewhere in each department."—*Medical Times*, Dec. 26, 1863.

"Crammed as full of hard facts as wellnigh 400 pages of large 8vo. can contain; all these facts attested by footnote authorities marshalled knee-deep at the bottom of every page; with a list of contents so copious as to eclipse everything of the kind in any recent scientific volume, and yet followed by an index more minute and ample; this work is a magazine of the infant science of Man; a model of German industry,

PUBLICATIONS OF THE ANTHROPOLOGICAL SOCIETY.

erudition, and philosophical devotion; and a credit to the Society which has sent forth, in a shape so serviceable, what might otherwise have proved a tantalising mass of learned collectanea. . . . We have perused this translated volume with alternate wonder and amazement at its strange assemblage of facts, its curious classifications, its marvellous revelations of human peculiarities; and we do not hesitate to say that more food for speculation, a more cosmopolitan and comprehensive glance over all the developments of savage and civilised man has been collected here, than could have been dreamed of by those who may not have given it a perusal."—*Dorset County Chronicle*, Nov. 18, 1863.

"Dr. Waitz would appear to have collected together all the authorities and contradictory statements of former writers. . . . The present work will be hailed with pleasure by all who are interested in the study of anthropology, and will, it is hoped, induce a more universal acquaintance with the science."—*Observer*, Nov. 8, 1863.

"The Anthropological Society of London have done well in publishing a translation of Dr. Waitz's *Anthropologie der Naturvölker*, of which this volume is the first instalment. Dr. Waitz's work is by far the most complete that exists on the subject of which it treats. It is the fullest collection of facts, interwoven with, and made to bear upon, all the theories (and their name is legion) which have been advanced in explanation of the endless diversities and resemblances that exist among mankind. Dr. Waitz himself is wedded to no particular theory, and in this volume, at least, advances none, but he points out with great clearness the effects that may be fairly attributed to the various influences, external and internal, physical and psychical, which affect the human form and national character."—*The Press*, Dec. 5, 1863.

"This volume will help to put the science of anthropology in a proper light before the scientific men of this country. Whatever faults we may have to find with this work, we feel sure that its publication marks an epoch in the study of anthropology in this country. The anthropologist can now say to the inquirer, Read and study Waitz, and

you will learn all that science has yet to reveal."—*Anthropological Review*, No. 3.

"The Anthropological Society deserve great praise for the energy and activity they display in prosecuting their object. . . . We find in this volume a fair statement and discussion of the questions bearing on the unity of man as a species, and his natural condition. He gives a very clear account of the different views held on these questions, and a full collection of the facts, or supposed facts, by which they are supported. The chief fault of the book is, indeed, this very fullness and fairness in collecting all that can be said on both sides of a question. . . . We must regard the work as a valuable addition to the books on this subject already in our language, and as likely, by the thought and inquiry it must suggest, to promote the great end of the Society—a truer and higher knowledge of man, his origin, nature, and destiny."—*The Scotsman*, Dec. 7, 1863.

"We need hardly say, that it is quite out of our power to give any detailed account of this volume. It is itself a volume of details. Its nature, character, and value, may be gleaned from the criticism bestowed upon it by the Anthropological Society, and by the fact of its being their first offering to their members. There can be no doubt that it is the best epitome of matters anthropological now contained in our language; and will be of great service to the student as a book of reference."—*British Medical Journal*, December 26, 1863.

"The difficulties which a reader experiences who studies Waitz's original German version—difficulties attendant on the involution of his style, and the frequent mistiness of his forms of expression—vanish in the English edition, which also differs from its German prototype, inasmuch as the embarrassing references which Waitz intercalated in his text are prudently cast down by Mr. Collingwood to the foot of the page. . . . The student will but have to read it through, in order to feel himself endowed with an enormous power of acquired facts, which, if he duly assimilates, will enable him to wield a tremendous weapon in controversy against the unskilled anthropologist."—*Reader*, November 7, 1863.

On the Phenomena of Hybridity in the Genus

HOMO. By Dr. PAUL BROCA, Secrétaire Général à la Société d'Anthropologie de Paris. Edited, with the permission of the Author, by C. CARTER BLAKE, F.G.S., F.A.S.L.

OPINIONS OF THE PRESS.

"Although the author of the essay can scarcely be supposed to have satisfied himself—much less to have satisfied his scientific readers—that he has arrived at any certain and well-grounded conclusion, he deserves the credit of having written with some research and acumen. It is evident that the writer of the book has a strong bias to the polygenist theory of the origin of mankind, but although we do not agree with him in his principal deductions and statements, we willingly allow his work to be an able monograph on a highly-interesting and curious subject, and one that will well repay perusal."—*Medical Times*, March 1864.

"While we find fault with the conclusions at which M. Broca arrives, we cannot deny that he has given to the student of Anthropology a very valuable collection of information on an almost unexplored subject. We have only to guard ourselves from being led away by the specious fallacies of his reasoning, and we shall find before us a wide field of thought and a subject of enquiry almost inexhaustible. We need only add that the English edition has been prepared with great care, and reflects extreme credit upon its indefatigable editor."—*Tablet*, June 4, 1864.

"This is a work on a very abstruse and much-debated question, and the author has brought to bear upon its elucidation a vast amount of scientific research, being the results of observations in almost every part of the world."—*Observer*, April 10, 1864.

"It is wonderful what solid and valuable information has been here compacted together within less than one

hundred pages octavo. Another work of very considerable value has thus been added to the list of publications now commenced, with a prospect, let us hope, of fast multiplying into a substantial library, under the auspices and, more than that, under the careful supervision and at the direct instance of the Society of our London Anthropologists."—*Sun*, April 7th, 1864.

"As a statement of the argument on both sides of a subject very difficult of investigation, Dr. Broca's treatise is most acceptable, although we are by no means satisfied that he has entertained all the causes which may be concerned in influencing the fertility of races, *inter se*, in his estimate."—*London Review*, June 4, 1864.

"The whole subject is too obscure to warrant us in advocating either the one view or the other; but we can recommend those who wish to make themselves acquainted with the present state of our information on the question to study the able treatise before us."—*Scotsman*, June 25, 1864.

"It may be stated that the present volume is the only one which completely investigates the subject of human hybridity.....The volume is an addition to scientific lore; we have no doubt that the members of our various learned societies will appreciate its worth, and experience the same pleasure in reading the translation which Mr. Blake states he received when he first perused the original. It is dedicated as a testimony of respect and friendship to Richard Owen, F.R.S."—*Morning Advertiser*, May 2, 1864.

The Plurality of the Human Race: by

GEORGES POUCHET, M.D., Licentiate of Nat. Science, Corr. Mem. Anthropol. Soc. of London. Translated and Edited from the Second Edition, by HUGH J. C. BEAVAN, Esq., F.R.G.S., F.A.S.L., of the Middle Temple, Barrister-at-Law.

OPINIONS OF THE PRESS.

"This book, which has already had considerable success in France, has been translated for the publishing committee of the Anthropological Society of London, and the task confided to Mr. Beavan has been accomplished with care and intelligence. It is probably the first work of the kind which has ever been given to the English literary world in a convenient and popular form, and, though it contains many peculiar thoughts and principles widely differing from the opinions of the general public, it will certainly be read with great interest. There is much clearness and even brilliancy in M. Pouchet's style, though the expressions are often very peculiar, but all will admit that it is a well-considered book, and full of important matter."—*Observer*, Oct. 1, 1864.

"The work of M. Pouchet is very brief, and yet it is full of interest, and, in the course of some couple of hundred pages, discusses all the more prominent and exciting topics in the physical history of man, bringing to bear upon them much curious information, and throwing over all the charm of a most pleasant and vigorous style."—*London Review*, Oct. 22, 1864.

"This slender volume, which professes to teach a great many wonderful things, is one of the publications of the Anthropological Society. It is the work of a French *savant*, Dr. Pouchet, who, like all Frenchmen, is brilliant, antithetical, confident, and superficial. We have neither space nor time to enter here into the controversy which this book provokes, but merely to notice the manner in which it has been translated and edited by Mr. Beavan. Without having the original by us for the purposes of comparison, we can see that the translation is cleverly done, and that the epigrammatic terseness of the French literary style is admirably preserved in the translation. The editing consists of a sufficient supply of explanatory foot-notes, a proof that the work has been done in a careful scholarly manner, and not with that haste and slovenliness which disfigure too many of our translations from the French.

To those who take an interest in anthropological investigations Mr. Beavan's Pouchet will be a 'handy-book' of considerable value."—*United Service Gazette*, Nov. 19, 1864.

"Ranging himself in the ranks of believers in original diversity of race, M. Pouchet here reviews the evidence for and against this theory, and states in his Recapitulation that 'Since we have found that man is comparable in all points to animals, we ought to seek for him and for them a common origin, and the difficulty of admitting an initial miracle has led us to the idea of *evolution*.' . . . The work is published for the Anthropological Society, and to students of that science it will be welcome and useful."—*Weekly Dispatch*, Oct. 23, 1864.

"The work, from its largeness of illustration, cannot but interest those who may nevertheless protest against the writer's conclusions as vigorously as his editor feels obliged to do."—*Globe*, Oct. 31, 1864.

"This work is published by 'The Anthropological Society,' and is one of those remarkable treatises which give rise to so much discussion in the present times, inasmuch as it treats of the subject of the development of the human family from more than one source with considerable cleverness, although not with arguments sufficiently forcible or unanswerable to convince those who are resolved to adhere to the simplicity of the Mosaic definition. That there are many infidel notions expressed in M. Georges Pouchet's original text, the translator does not hesitate to assert. Indeed, he is frequently at the pains to demolish their fallacy, and expose many other faults of the author, discriminating with considerable tact between what is deserving of consideration and what is manifestly insidious and fallacious. The treatise is not a book for the multitude, but rather for the learned and scientific, and may be pronounced to be clever and dexterous rather than sound and convincing."—*Bell's Messenger*, Oct. 8, 1864.
