Journal of Geophysics

Editors' Preface

This issue of *Journal of Geophysics* contains the proceedings of the Eleventh International Symposium on Mathematical Geophysics which was held at Seeheim/Odenwald, Federal Republic of Germany, from August 18–27, 1976, under the auspices of the IUGG Inter-Association Committee on Mathematical Geophysics. Almost half the number of papers that were given at this symposium are printed in this issue. Abstracts or short communications from other papers which have already appeared or will appear soon in other journals have also been included. Thus the research presented at Seeheim seems to be well documented.

We take the opportunity to express our thanks to all who supported the symposium, especially to the International Union of Geodesy and Geophysics, the Deutsche Forschungsgemeinschaft, and the Kultusministerium Baden-Württemberg. The publication of this issue is supported by a grant of the Deutsche Forschungsgemeinschaft.

K Fuchs G Müller
